

NET-5 IP SPEAKER

NET-5 CALL

NET-5 CALL is the perfect complement to your NET-5 IP speakers, if you prefer to use a programmable call station instead of a headset.

Secured by an included key, the call station offers easy configuration of your individual or group calls to your desired zones. It also allows your defined audio streams and alarms to be easily controlled by the user.

Whether you are using files stored on your hard disk or by the SD-card slot on the rear of NET-5 CALL, it is easy to stream your music feeds.

Signals like alarms can also be controlled externally via a potential-free contact (IN & OUT), an integrated speaker gives you direct feedback of your system sounds.

The high-quality finish and the crystal-clear, large display make the call station a real eye-catcher.

A pop shield for the microphone is also included in the scope of delivery, just like the plug for the local power supply.

Key specifications:

Item: 20206214

Management: 1.200 speaker groups

Input: Standard RJ45

Frequency response: 20Hz - 16Khz (+1dB, -3dB)

S/N Ratio: > 70dB

Power consumption: 10W
