Mounting Instruction

1. Mount the U-bracket on the ceiling with the appropriate screws for the surface.
2. If necessary, remove the speaker enclosure from the U-bracket.
3. Insert the loudspeaker cable through the cable entry of the previously removed rear wall of the housing.
4. Connect the loudspeaker cable to the terminals 100V and COM.
   If necessary, select a different power tapping.
5. Carefully reinsert the back panel into the housing.

An integrated thermal fuse automatically disconnects the loudspeaker driver in the event of excessive heat (e.g. due to fire or driver failure), preventing a short circuit across the 100V line. Do not bypass or remove the thermal fuse under any circumstances. Verify the integrity of the connection cable during periodic maintenance.
